

Thomson Reuters Update to Security

March 2018

DigiCert Inc., has completed its acquisition of Symantec's Website Security and related PKI solutions. With this transition, Thomson Reuters is replacing affected certificates. More information may be found here:

<https://www.websecurity.symantec.com/digicert-and-symantec-faq>

Thomson Reuters will change certificates, like other impacted organizations, to the new certificate. The certificate we are changing to is used widely by other sites. This should have little to no impact to your firm, but you may wish to follow the proactive step below to ensure seamless access to all Thomson Reuters' products.

Simple way to ensure you have the correct certificate for TR Products:

Test browsers for compatibility

Go to <https://global-root-ca.chain-demos.digicert.com> and ensure no warnings or errors are displayed in the browser. If warnings, download the certificate noted below.

In the unlikely event you get a warning after clicking the link above:

The DigiCert Global Root CA certificate is available at <https://www.digicert.com/digicert-root-certificates.htm>

Match to thumbprint (see Fig 1 below): A8985D3A65E5E5C4B2D7D66D40C6DD2FB19C5436
