

WESTLAW AU MAY 2018 RELEASE

Enhancing your legal research experience

Thomson Reuters works in partnership with our customers to develop solutions and services that meet your needs. We take the time to seek your feedback and have incorporated it into our development pathway.

We have used that information to enhance Westlaw AU and are excited to share with you detail on the enhancements scheduled to release **10pm on the 17th of May**.

We recommend you review the release notes below and update any internal training material you may have.

The Release Notes provide a summary of the enhancements, followed by a more detailed explanation.

RELEASE SUMMARY

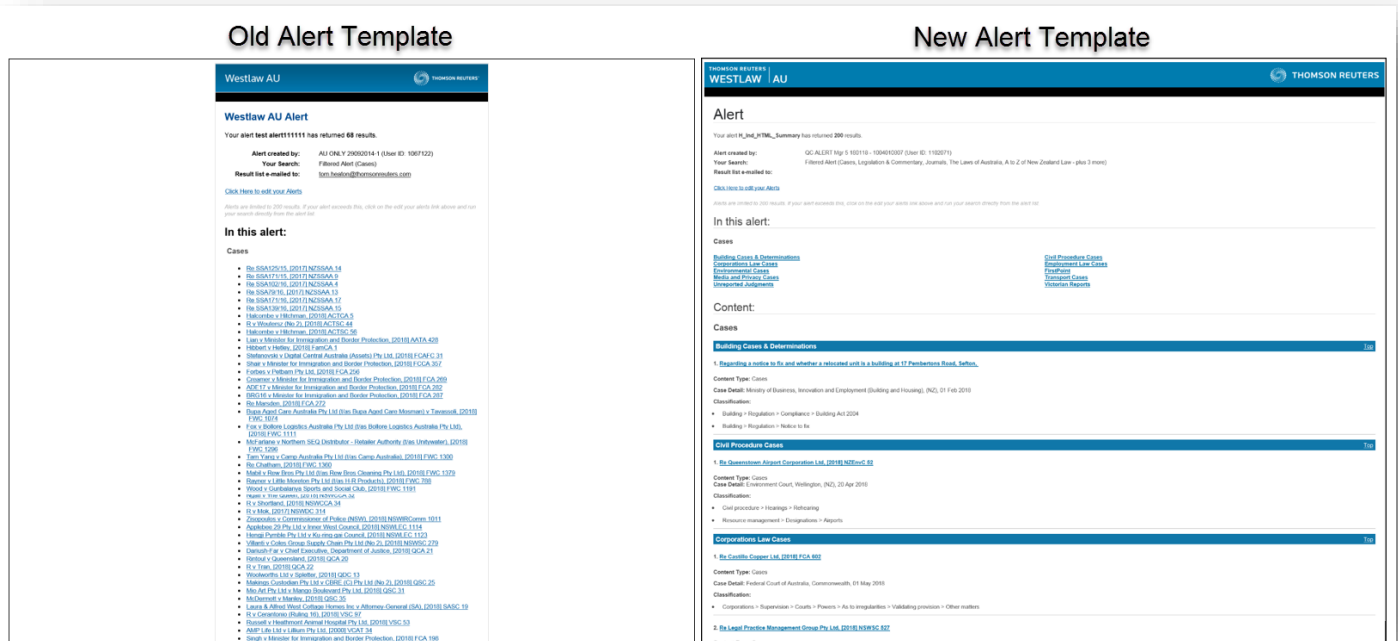

FEATURE	SUMMARY
Alert Template Change	Changes to the look and feel of the Alert Template generating from Westlaw. All existing functionality is still available, but users will notice some changes to the font and layout.
Responsive Alert Screen Design	New responsive design of the alert screen to improve user experience. It better supports the use of Westlaw Alerts on multiple device screen sizes including mobile devices.
Alert Grouping by Product	Our alerts format has been enhanced to make it easier to identify changes in products. We have done this by grouping alert results by product as well as by content type.
Predictive Text Disablement	In response to customer feedback, we have disabled the predictive text suggestions for a few search fields where the functionality doesn't work properly.

Changes to Alert Template

We have made some minor changes to the look and feel of the Alert Template. All existing functionality is still available, but users will notice some small changes to the font and layout. This change is applied to alerts only in the HTML format that are created directly from Westlaw.

Note:

- There is no change to the Alert 24 template. * For more information, please see the page 6.
- There is no change to the PDF and RTF alert template.

Responsive Alert Screen Design

The dynamic, device friendly, alert template makes use of responsive design to adapt the layout of alerts depending on what kind of device it is being viewed on. It better supports the use of Westlaw Alerts on multiple device screen sizes.

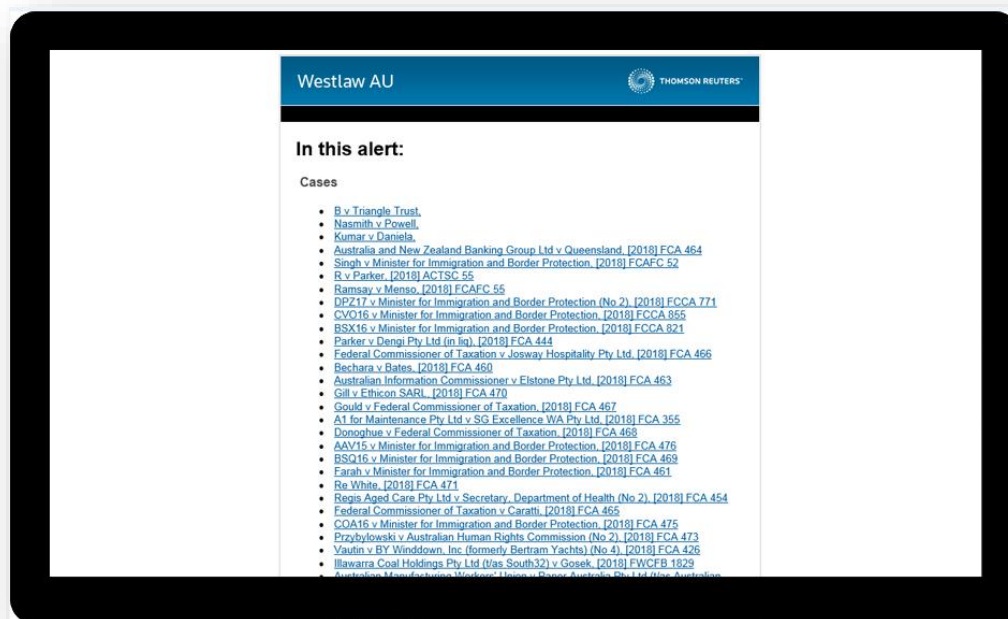

Benefits of the responsive alert screen design include:

- Provides a seamless user experience: Whether Alerts are viewed from your desktop or your smart phone you will have an optimised user experience.
- Adaptability to any screen size: it will intelligently detect your screen size and utilise the entire screen of your devices.

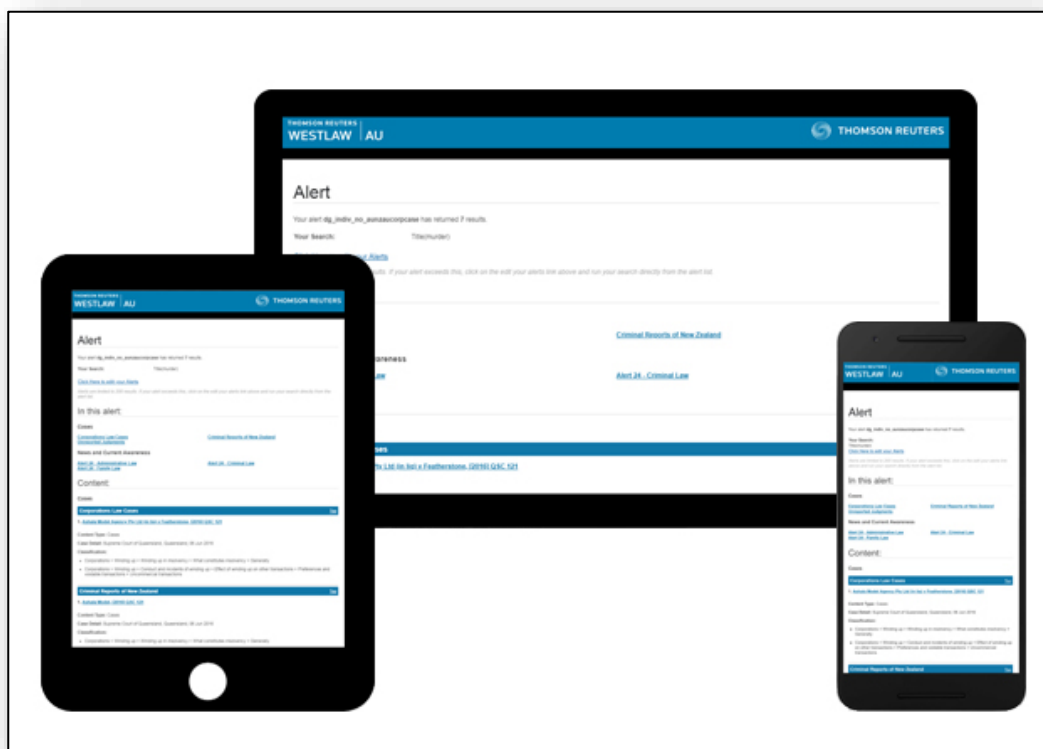

Note:

- There is no change to the Alert 24 template. * For more information, please see the page 6.
- There is no change to the PDF and RTF alert template.

Old Alerts – The width of the alert template is fixed and doesn't utilise the entire screen of your devices.

New Alerts – intelligently detect your screen size and utilise the entire screen of your devices.

Alert Grouping by Product

In response to customer feedback we have enhanced our Alerts to make it easier to identify changes in products. We have done this by grouping alert results by product as well as by content type.

In the old Alerts, updates are listed without any particular order whereas in the new Alerts, all updates are grouped by product and by content type. It's easy to see where an update is made under what product.

Note:

- There is no change to the Alert 24 template. * For more information, please see the page 6.
- There is no change to the PDF and RTF alert template.

Old Alert Template

The screenshot shows a 'Westlaw AU Alert' with 68 results. Under the 'Cases' section, there is a long, unsorted list of case references such as 'Re SSA12045, [2017] NZSSAA 14', 'Re SSA1716, [2017] NZSSAA 9', etc. There is no visual grouping or categorization of these results.

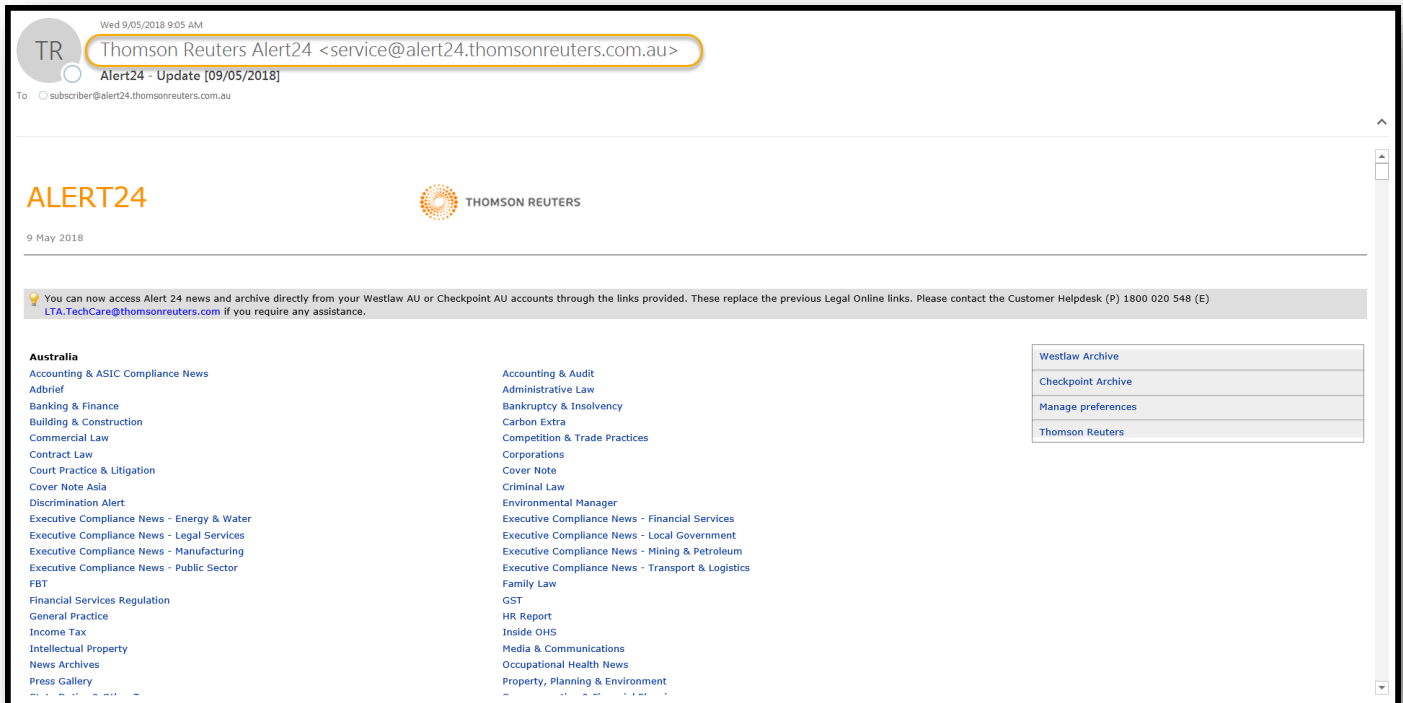

New Alert Template

The screenshot shows an 'Alert' with 200 results. The 'Content' section is organized into distinct product categories, each with a blue header bar:

- Building Cases & Determinations** (100 results): Includes 'Regarding a notice to fix and whether a relocated unit in a building at 17 Pemberton Road, Selwyn'.
- Civil Procedure Cases** (108 results): Includes 'Re Queensland Airport Corporation Ltd, [2018] NZEnvC 82'.
- Corporations Law Cases** (108 results): Includes 'Re Castillo Copper Ltd, [2018] FCA 552'.

 A yellow arrow points from the text 'Grouping alert results by product' to these category headers.

* You may receive another Alert Template from *Thomson Reuters Alert 24* (service@alert24.thomsonreuters.com). See the screen shot below. You are receiving this alert because you subscribe to Alert 24 products and no change has been made to this alert template. The changes are applied to alerts that are created directly from Westlaw only.

Predictive Text Disablement for a few search fields where the functionality doesn't work properly.

There is an issue with the predictive text suggestions offered when using the *Cases Cited (Title)* and the *Legislation Cited (Title)* fields in the Westlaw search template across all content types.

The following image shows an example of what happens when attempting a search for cases considering the *Australian Consumer Law*. When 'Australian Consumer Law' is entered in the 'Legislation Cited (Title)' field, a large number of incorrect title suggestions are included in the predictive text list. The predictive text suggestions include spelling mistakes, incorrect abbreviations, misplaced brackets, and variant capitalisations for the Australian Consumer Law and they create confusion.

This problem occurs because the list of legislation titles and cases presented by predictive text currently includes titles extracted from unreported Judgements which come directly from the Courts and are not subject to editing. We are working closely with our Editorial and Technology teams to identify options for excluding incorrectly cited titles from the extraction, and identifying a "cleaner" source to use.

Until we are able to complete this work, the predictive text suggestions for the *Cases Cited (Title)* field and the *Legislation Cited (Title)* field across all search templates will be temporarily disabled.

The screenshot displays the Westlaw AU Advanced Search Options page. The 'Cases Cited (Title)' and 'Legislation Cited (Title)' fields are highlighted with orange boxes. A text box with an arrow pointing to these fields contains the text: "Predictive text suggestions will be disabled temporarily." The 'Legislation Cited (Title)' dropdown menu is open, showing a list of suggestions including "Australian Consumer Law", "Australian Consumer Law, Suda Ltd pursuant to Trade Practices Act 1974", "Australian Consumer Law", "Australian Consumer Law 2010", "Australian Consumer Law 2010 (Cth)", "Australian Consumer Law 2010 (NS)", "Australian Consumer Law 2010 (NSW)", and "Australian Consumer Law 2011".

In the meantime, the most effective way to search the Legislation Cited (Title) and Cases Cited (Title) fields is to manually type the full correct legislation or case title that you wish to locate and enclose your title in quotation marks (" ") to get the best results.

The screenshot shows the same Westlaw AU Advanced Search Options page. The 'Legislation Cited (Title)' field is highlighted with an orange box and contains the text "Australian Consumer Law" enclosed in quotation marks. The 'Cases Cited (Title)' field is also highlighted with an orange box but is empty.

*To find more tips on how to search by using the Legislation Cited (Title) and Cases Cited (Title) fields, click [here](#).
